# The Art of Playing the Piano by Ear

*with the aid of*

A New and Interesting System of playing Popular and Ragtime Music, which can be learned by anyone who is fond of music, in less than two months' time. This is my own idea, and nothing like it has ever appeared on the market before. I don't have to read music, as I play entirely by *ear*, and through the knowledge of harmony and composition which I gained in this way I was enabled to compose "*When September comes Around Again*."

The secret of my success lies in the fact that I discovered that *the composition of all popular songs is similar*, and I explain this in my System so clearly that you cannot help but understand it, and learn to play. This System teaches you to play any song of which you know the melody. I now play over 700 songs and can instantly play any new song after I have heard it once or twice. What you save in the cost of sheet music will more than pay for the complete Course, the cost of which is only \$8.00.

Send \$1.00 for first lesson.
